

Handout for Indigenous Environmental Planning Lecture #2

Topic: Tribes and Climate

1. Which of the three framing methods noted in the presentation would you consider employing to improve others understanding of the climate crisis and the need for everyone to play a role?

Framing Tool (Analogy): ☐ Overheated Car Interior ☐ Bathtub Spilling ☐ Steroids in Sports
How might this analogy help you make climate science more understandable and actionable? _____

2. Based on the [social network analysis concepts](#) covered in the session slides on Capacity Building, the pre-session materials, and these [online definitions](#), which might be the most important determinant of a [healthy core-periphery network structure](#)? (*see definitions for help*)

☐ Bonding Ties ☐ Bridging Ties ☐ Unconnected clusters and isolates

Why? _____

3. Consider a real social network in your life or one that you can envision from other sources. As best you can, on the back or on a separate sheet of paper draw a network representing your relationships at University of New Mexico or in your workplace or both & how the two connect.

4. Based on the network diagram you completed in (3), how might people you already know help you find a new job or a *better* one than the one you already have now?

5. Based on the Tribes and Climate session, what is one thing you might teach a friend?

6. What aspects of this session provided new or different angles on this topic for you?

7. How might what you learn directly apply to your anticipated career? Or not?
